

STATISTICAL MODELLING  
OF QUATERNARY  
SCIENCE DATA

Edited by  
D. MADDY & J.S. BREW

## CONTENTS

|  |            |
|--|------------|
| <b>PREFACE</b> .....   | <b>ix</b>  |
| <b>CHAPTER 1: MULTIVARIATE DATA ANALYSIS</b> .....                                 | <b>1</b>   |
| GENERAL PRINCIPLES .....   | 1          |
| CLUSTER ANALYSIS .....   | 1          |
| <i>Agglomerative methods</i> .....   | 6          |
| <i>Divisive methods</i> .....  | 14         |
| <i>Computer programs for cluster analysis</i> .....                                | 19         |
| ORDINATION TECHNIQUES .....  | 20         |
| <i>Principal components analysis</i> .....   | 21         |
| <i>Factor analysis</i> .....   | 22         |
| <i>Principal coordinates analysis</i> .....  | 23         |
| <i>Correspondence analysis</i> .....   | 29         |
| <i>Detrended correspondence analysis</i> .....                                     | 31         |
| <i>Canonical correspondence analysis</i> .....                                     | 33         |
| <i>Computer programs for ordination</i> .....                                      | 36         |
| CONCLUSIONS .....  | 36         |
| REFERENCES .....   | 36         |
| <b>CHAPTER 2 : FACTOR ANALYSIS: A PRACTICAL APPLICATION</b> .....                  | <b>39</b>  |
| INTRODUCTION .....   | 39         |
| THE METHOD .....   | 41         |
| <i>Example 1: A hypothetical data set</i> .....                                    | 43         |
| <i>Example 2: Lake sediments as records of land-use change</i> .....               | 45         |
| CONCLUSIONS .....  | 56         |
| REFERENCES .....   | 56         |
| <b>CHAPTER 3 : TIME AND SPATIAL ANALYSIS</b> .....                                 | <b>65</b>  |
| TIME SERIES METHODS .....  | 65         |
| <i>Identifying stratigraphic zones</i> .....                                       | 65         |
| <i>Identifying breakpoints for individual sequences</i> .....                      | 69         |
| <i>Practical considerations</i> .....  | 71         |
| <i>Time Series Analysis</i> .....  | 72         |
| <i>Spectral analysis</i> .....   | 84         |
| SPATIAL ANALYSIS .....   | 91         |
| <i>Sampling and scale</i> .....  | 92         |
| <i>Methods of estimation</i> .....   | 96         |
| REFERENCES AND FURTHER READING .....   | 104        |
| <b>CHAPTER 4 : TREE-RINGS, SEQUENCE MATCHING AND CLIMATIC RECONSTRUCTION</b> ..... | <b>107</b> |
| CROSSMATCHING TREE-RING SERIES .....   | 108        |
| <i>Autocorrelation</i> .....   | 113        |
| <i>Standardisation</i> .....   | 113        |
| <i>Estimation of Common Signal</i> .....   | 117        |
| <i>Looking at the climate-growth relationship</i> .....                            | 118        |
