

ENVIRONMENTAL MAGNETISM
A PRACTICAL GUIDE

edited by
J. Walden, F. Oldfield & J. Smith

Technical Guide No. 6

Contents

Chapter	Title	Page
1	Introduction <i>Frank Oldfield</i>	1
2	An introduction to the magnetic properties of natural materials. <i>John Smith</i>	5
3	Sample collection and preparation. <i>John Walden</i>	26
4	Magnetic susceptibility. <i>John Dearing</i>	35
5	Remanence measurements. <i>John Walden</i>	63
6	Electromagnetic units and their use in environmental magnetic studies. <i>Ian Snowball</i>	89
7	The rock magnetic identification of magnetic mineral and grain size assemblages. <i>Frank Oldfield</i>	98
8	Evaluating magnetic parameters for use in source identification, classification and modelling of natural and environmental materials. <i>Joan Lees</i>	113
9	Laboratory procedures for quantitative extraction and analysis of magnetic minerals from sediments. <i>Mark Hounslow and Barbara Maher</i>	139
10	Additional measurements using a vibrating sample magnetometer. <i>Joan Lees and John Dearing</i>	185
11	Additional rock magnetic measurements. <i>Derek France, Yuquan Hu, Ian Snowball, Tim Rolph, Frank Oldfield and John Walden</i>	197
12	Environmental magnetism; the range of applications. <i>Frank Oldfield</i>	212
