THE QUATERNARY GLACIATION OF THE MOURNE MOUNTAINS

Field Guide

Edited by
S. Roberson, I. Barr and M Cooper

Glacial Landsystems Working Group
Irish Quaternary Association
& Quaternary Research Association

2016
Cover photograph: A view northeast from Slieve Lamagan towards Slieve Donard, the Mourne Mountains (S. Roberson)

This field guide was produced to accompany the joint QRA - GLWG - IQUA Field Meeting to the Mourne Mountains based in Newcastle, Co. Down, 27th – 30th October 2016

Acknowledgements

We would like to thank the following for their assistance with various aspects of the production this field guide: John Patterson for access to the Ballynahatten sand and gravel pit; Jim Bradley for access to Ballynahinch recycling centre; Northern Ireland Environment Agency for permissions to reproduce Figure 11.1; Land and Property Services for use of their digital elevation model in Figures 1.1, 3.2, 3.5, 4.1, 4.2, 6.1, 7.1, 11.2 and 12.1. All other maps are produced using SRTM elevation data and Open Street Map topography. Thanks to Jonathan Lee (QRA Publications Secretary) for advice on organisation and layout and Calvin at Adlard Print for print production.
To the young geologist, who has time as well as strength at command, I cannot conceive any undertaking more calculated to benefit both mind and body, while he will thus be able to add his contribution to the general store of glacial literature.

Edward Hull (1878, p. 265) on mapping the glacial geology of the Irish mountains.
