HOLOCENE TEPHROCHRONOLOGY APPLICATIONS IN SOUTH ICELAND

Field Guide and Roadlog

Editors:
Guðrún Larsen, Jón Eiríksson

QRA Field Meeting 2012

QRA
Quaternary Research Association
Guðrún Larsen, Jón Eiríksson, and Esther Ruth Guðmundsdóttir:
Institute of Earth Sciences, University of Iceland, Askja, Sturlugata 7,
IS-101 Reykjavík, Iceland. Corresponding editor’s email: glare@hi.is

Kristján Ahronson: School of History, Welsh History and Archaeology, Bangor
University, Bangor, Gwynedd, UK, LL57 2DG.
Contents

Foreword 3
Contents 5

Chapter 1 Outline of the Geology of Iceland (J. Eiríksson) 7
1.1 Plate Tectonic Setting 7
1.2 Geological history 9

Chapter 2 Volcanism in Iceland (G. Larsen & J. Eiríksson) 13
2.1 Introduction 13
2.2 Volcanic Systems 14
2.3 Frequency of Eruptions and Volcanic Productivity 14
2.4 Explosive Volcanism 15
2.5 Volcanism and Glaciers 17

Chapter 3 Tephrochronology - A Brief Overview (G. Larsen & E. R. Guðmundsdóttir) 19
3.1 Introduction 19
3.2 Background Information and Definitions 20
3.3 Macro- and Microscopic Characteristics 20
3.4 Chemical Characteristics 21
3.5 Dispersal of Tephra 22
3.6 Frequency of Holocene Explosive Eruptions 23
3.7 Tephra Layers in Terrestrial Sequences 25
3.8 Dating of Tephra Layers in Iceland 25
3.9 Holocene Tephrochronology in South Iceland 26

Chapter 4 Field Trip Itinerary (J. Eiríksson, G. Larsen, & E. R. Guðmundsdóttir) 27

Chapter 5 Introduction to Excursion Day 1: The Hekla Volcanic System (G. Larsen) 29
5.1 Introduction 29

Chapter 6 Roadlog - Day 1 (17.09. Monday): Large Silicic Hekla
Tephra Layers (J. Eiríksson, G. Larsen, and E. R. Guðmundsdóttir) 31
6.1 Nesjavellir Geothermal Power Plant 31
6.2 Þingvellir Plate Margin 31
6.3 The Geysir Geothermal Area 32
6.4 The Gullfoss Waterfall 32
6.5 Quarry at Hólagot 33
6.6 Trjáviðarlækur Gully - Hekla-1, Hekla-3, Hekla-4 and Hekla-5 33
6.7 Stöng 34

Chapter 7 Introduction to Excursion Day 2: The Bárðarbunga-Veíðivötn Volcanic System (G. Larsen) 35
7.1 Introduction 35
7.2 ± AD~870 Vatnaöldur Eruption 36
7.3 ± AD~1477 Veíðivötn Eruption 37
7.4 Environmental Impact 37

Chapter 8 Roadlog - Day 2 (18.09. Tuesday): Large Basaltic Tephra Deposits from the Bárðarbunga-Veíðivötn System (G. Larsen, J. Eiríksson, and E. R. Guðmundsdóttir) 39
8.1 Deposit of the Basaltic AD ~870 Vatnaöldur Tephra on Road F26 (Sigalda) 39
8.2 The Vatnaöldur Volcanic Fissure - the Vatnaöldur Innri Tephra Rings 39
8.3 The AD~1477 Veíðivötn Volcanic Fissure 40
8.4 Ferjufit 41

Chapter 9 Introduction to Excursion Day 3: Silicic, Intermediate and Basaltic Tephra from the Hekla, Torfajökull, and Katla Systems (G. Larsen) 43
9.1 Introduction. ±e Eastern Volcanic Zone 43
9.2 The Katla Volcanic System and the Eldgjá Eruption 43

10.2 Fjallabaksleið – The Hekla-X, -Y and -Z Tephra Layers 46
10.3 Dómadalur – Regional Tephra Stratigraphy 48
10.4 Landmannalaugar 48
10.5 Old tephra – Roadside Exposure 49
10.6 Eldgjá Chasm and Tephra 49
10.7 Skaftáreldahraun 50

Chapter 11 Introduction to Excursion Day 4: Volcanogenic Flood Deposits - Subglacial Silicic and Basaltic Tephra (G. Larsen) 51
11.1 Introduction 51
11.2 Öræfajökull Central Volcano 51
11.3 Katla Eruptions and Jökulhlaup 52
11.4 Environmental Changes During the last 11 Centuries 52

12.1 Skeiðarárásandur 53
12.2 AD 1362 Öræfajökull Tephra near Hnappavellir 54
12.3 Grímsvötn 2011 tephra at Lómagnúpur 54
12.4 Eldvatn – Katla regional stratigraphy 55
12.5 Mýrdalssandur and the AD~934 Eldgjá Lava 56

Chapter 13 Introduction to Excursion Day 5: Eyjafjallajökull 2010 (G. Larsen) 59
13.1 The Eyjafjallajökull Volcanic System 59
13.2 The Eyjafjallajökull Eruption in 2010 59

Chapter 14 Seljaland: Archaeology, Palaeoecology and Tephrochronology (K. Ahronson) 61

15.1 Sólheimajökull 67
15.2 Seljaland. Archaeological Site (cf. Chapter 14) 68
15.3 2010 Tephra at Gígjökull and the Lagoon, Infilled by 2010 Flood Deposits 68
15.4 Prehistoric Katla Jökulhlaup at Lausalda Dated by Tephrochronology 68
15.5 Central South Iceland Lowlands 70
