Acknowledgements:

In preparing and compiling this Field Guide we owe particular thanks to all of the contributors to the guide and also for cartographic assistance to Jenny Kynaston (Royal Holloway, University of London), who drafted or re-drafted many of the figures and whose advice in other aspects of the production of the guide has been most useful. Likewise we would like to thank Jonathan Lee (Publications Secretary, QRA), Clare Boston (Meetings Officer, QRA) and Calvin Adlard of Adlard Print & Reprographics Ltd., for useful technical advice and assistance in the production of the Field Guide. Furthermore, we would like to thank Elizabeth Courtney and Tracey Whyte who have been incredibly helpful in organising accommodation for the field trip.

We and the other contributing authors also wish to acknowledge the permissions to use NEXTMAP imagery from Intermap Technologies and LiDAR data through the Environment Agency. Under nearly all circumstances the permission is granted through our educational and research work but the data is of incredible use to earth scientists and archaeologists alike. Laura Eddey and Mark Bateman would like to thank the following people for their support in their research in the Vale of Pickering area: Rob Ashurst, David Birdsall, Sarah Bradley, Jeremy Ely, Cathy Delaney, Alicia Medialdea. Also of great assistance in the field were the BGS DANDO team: Carl Horabin, Dave Morgan and Steve Thorpe, and further thanks goes to Jonathan Lee, Stephen Livingstone, the Marton family at Rise Farm, Paul Morley and family at Ings Farm, Polly and Chris Williams: Finally, the Cook & Son sand quarry at Heselton are thanked for access to the site.

Andy Josephs, and the Oxford Archaeology team are thanked for their help, particularly in the early stages of investigations at Wykeham Quarry, and also members of Hanson Aggregates including Ben Ayres, Stewart Laws, Dan Senkans and Tim Harvey who have facilitated working at Wykeham Quarry making the work an enjoyable and rewarding experience. Jacob Bendle, Anna Bird, Ben Hanger, Sophie Jarosz, David Lincoln, Jenni Sherriff, and Rhys Timms, are thanked for their help and enthusiasm in the field. Jonathan Holmes is thanked for the identification of ostracod remains from the Seamer Basin, and thanks are also extended to Robert Pigg and Robert Sword for granting access to the Wykeham sites.

For the access to land and financial support to carry out the work in Palaeolake Flixton area, we thank the landowner of Star Carr, Stockdales Haulage firm, English Heritage/Historic England, and Natural England for granting permission to excavate. The excavations at Star Carr have been funded by the European Research Council POSTGLACIAL Project 283938; British Academy Grants SG-44333, SG-47081, and SG-50217; English Heritage/Historic England Grants 5536, 6064, 6793, 6796 and the radiocarbon dating of the site; Natural Environment Research Council Grant NE/I015191/1; and the Vale of Pickering Research Trust. We would like to thank Scarborough Council and Tim Burkinshaw (Cayton and Flixton Wetland and Carrs Project), Margaret Nieke and Jackie Roberts of Natural England for granting permission to core in this field.
