

The Quaternary of the Lake District

21-24 May 2015

Overview:

This meeting will consider some recent and ongoing Quaternary research in the Lake District, with the emphasis on glaciation and longer-term landscape development. The programme of field visits and short, evening presentations covers a range of topics, including:

- cirques;
- rock slope failure and landscape development;
- glaciation style and moraine development;
- subglacial landforms;
- relative dating of glacial depositional landforms (morphostratigraphy, soil chronosequences)
- deglacial history of Windermere (and models of post-LGM deglaciation)

Outline Programme (provisional):

- Thursday 21 May – Arrive in time for evening meal. Introductory talks.
- Friday 22 May – Fieldwork all day [Hayeswater, Pasture Beck, Clough Head / Threlkeld Knotts]. Evening short talks TBC.
- Saturday 23 May – Fieldwork all day [Honister Pass, Robinson, Wasdale Head and Mosedale]. Evening short talks TBC.
- Sunday 24 May – Fieldwork until ~2 pm [Deepdale]. Field meeting ends.
